

Amendments to the Specification:

Please make the following change on the paragraph beginning on Page 5, Line 18.

FIG. 2 illustrates a variant of the embodiment illustrated in FIG. 1, in which the suspended structure [[36]] 36' is in the form of a U-shaped clevis. More precisely, the suspended structure [[36]] 36' illustrated in FIG. 2 comprises two flat plates 70 parallel to each other. In this case, a cylindrical hole 56 is machined in each of the plates 70, such that the two holes 56 are centered on the same hinge pin A1.
